

Fellowship in Medical Simulation

Center for Simulation and Research

Cincinnati Children's Hospital Medical Center

The Center for Simulation and Research at Cincinnati Children's Hospital Medical Center (CCHMC) is seeking applicants for fellowship to join a dynamic group of simulationists. The fellow will work alongside two physicians (medical director, research director), an operations director, three education consultants, eight education specialists, two simulation technicians, an administrative assistant, five applications developers, and a research associate in our two multi-unit simulation labs and during in situ simulations at two free-standing, academic pediatric hospitals. The fellowship will be 12 months in length, with 50% of effort towards simulation and 50% working clinically in the fellow's unit of specialty.

CCHMC is an internationally recognized leader in pediatric healthcare, with a reputation for excellence in patient care, research, patient safety, quality improvement, and medical education. The Center for Simulation in Research is an accredited center for medical simulation by the Society for Simulation in Healthcare. We were the first accredited pediatric center in the United States, and currently are accredited in Core Operations, Education, Research, and Systems Integration. With over 110 current simulation courses representing diverse clinical and educational settings, a track record of successful mentorship and fellowship completion, and greater than 15 years of academic and research productivity in simulation-based medical education and health systems integration, the Center for Simulation and Research is offering a simulation fellowship in one of the leading pediatric simulation centers.

The generous benefit package includes 5 weeks of paid time off (vacation), CME fund, retirement contribution, life/disability insurance and malpractice coverage.

Interested candidates should complete an [online application](#) and send curriculum vitae and letter of interest to:

Gary L. Geis, MD

Program Director, Medical Simulation Fellowship
